### Pet Poison Safety Tips

*Please follow these guidelines to protect your pet from being exposed.*

- **Be aware of the plants** you have in your home and yard. The ingestion of azalea, oleander, sago palm, or yew plant material by an animal can be fatal. Easter lily, day lily, tiger lily, and some other lily species can cause kidney failure in cats.
- **Never allow your pets to have access** to the areas in which cleaning agents are being used or stored. Cleaning agents have a variety of properties; some may only cause mild stomach upset, but others can cause severe burns of the tongue, mouth and stomach.
- **When using rat, mouse, snail or slug baits, or ant or roach traps**, place the products in areas that are inaccessible to your companion animals. Some bait contains sweet smelling inert ingredients, such as jelly, peanut butter or sugar that can attract your pets.
- **Never give your pet medication unless** you are directed to do so by a veterinarian. Many medications that are safe for humans can be deadly for animals.
- **Keep all prescription and over-the-counter drugs** out of your pet's reach, preferably in closed cabinets. Pain killers, cold medicines, anti-cancer drugs, antidepressants, vitamins and diet pills are all examples of human medications that can be lethal to animals, even in small doses.
- **Many common household items** can be hazardous to pets. Mothballs, potpourri oils, coffee grounds, homemade play dough, fabric softener sheets, dishwashing detergent, batteries, cigarettes, alcoholic drinks, pennies, and hand and foot warmers could be dangerous for your pet.
- **Automotive products** such as gasoline, oil and antifreeze should be stored in areas that are inaccessible to your pets. As little as one teaspoon of antifreeze can be deadly to a cat weighing seven pounds.
- **Before buying a flea product** for use on your pet, ask your veterinarian for a recommendation.

- **Read all of the information on the label** before using a product on your pet or in your home. Always follow the directions.
  - **If a product is for use only on dogs**, it should never be used on cats; if a product is for use only on cats, it should never be used on dogs.
  - **Make sure your pets do not enter** areas in which foggers or house sprays have been used for the period of time indicated on the label. Birds are more sensitive to inhalants. Always check with your veterinarian before using any spray product in your home if you own pet birds.
  - **Make sure your pets** do not go on lawns or in gardens treated with fertilizers, herbicides or insecticides until they have dried completely. Always store such products in areas that are inaccessible to your pets.
  - **If you are uncertain about the usage** of any product, ask the manufacturer and/or your veterinarian for instructions.
